

Public Notice of River Closure Extension

Continuing through February 15, 2010

As TVA and EPA continue recovery of the Kingston ash spill, large hydraulic equipment is being used to expedite the removal of ash from the Emory River. To keep the river as safe as possible, the Emory River will continue to be closed from mile marker 1.5 to mile marker 3 through February 15, 2010.

No river traffic will be allowed through this area. In early February, EPA and TVA will review the situation and determine when the river can be reopened.

For transport around the Emory River closure due to significant need, please contact TVA at 865-717-1635 or emoryrivertransport@tva.gov. Advance notice of five business days is required to fill approved requests.
