

# PUBLIC COMMENT PERIOD

## on Non-Time Critical Work Plans for the Kingston Fossil Plant Ash Recovery Site

The Tennessee Valley Authority is working with the Environmental Protection Agency to recover the site of the Kingston Fossil Plant ash spill. As part of that process, important site documents are placed in the Administrative Record and are available for public review. Documents in the Administrative Record include, but are not limited to, correspondence, inspection reports, test results, the Action Memorandum, and work plans. All interested persons are encouraged to review the documents.

The following work plans regarding Non-Time Critical Removal Actions (actions which involve removing ash from the embayment and restoring the embayment to pre-spill conditions at the site) have recently been placed in the Administrative Record and are available for public review and comment:

### **Non-Time Critical Removal Action Work Plan for the Embayment/Dredge Cell:**

This document presents a framework for implementing the design and construction for restoration of areas within the Swan Pond Embayment and for closure of the former Dredge Cell impacted by the spilled fly ash.

### **Site Dust Control and Air Monitoring Plan:**

Control of dust and comprehensive air quality monitoring are two key elements of the overall response for the TVA Kingston Ash Recovery Project. This plan was originally prepared as part of the time critical removal action and has been revised to make it applicable to non-time critical removal activities.

### **Surface Water Monitoring Plan for the Emory, Clinch, and Tennessee Rivers:**

This plan revises and supersedes the Surface Water Monitoring Plan for the Emory, Clinch, and Tennessee rivers, Kingston Fossil Plant Ash Recovery Project (Jacobs 2009) issued by TVA and approved by the EPA in August 2009 with the commencement of aggressive dredging operations. This plan was originally prepared as part of the time critical removal action and has been revised to make it applicable to non-time critical removal activities.

### **Central Area Re-Contouring Work Plan, Revision 5:**

This work plan is to re-contour the central area of the old dredge cell to build a sub-grade to improve drainage and to stabilize the dredge cell against erosion.

Site documents can be read and reviewed at the following locations:

TVA Outreach Center  
509 N. Kentucky Street  
Kingston, Tennessee  
(865) 632-1700

Kingston Public Library  
1004 Bradford Way  
Kingston, Tennessee  
(865) 376-9905

These same documents are available on computer disk at the following location:

Harriman Public Library  
601 Walden Street  
Harriman, Tennessee  
(865) 882-3195

The Administrative Record is also available online at: [www.tva.gov/kingston](http://www.tva.gov/kingston).

TVA welcomes your comments on these documents. A 30-day public comment period begins on September 1, 2010 and ends on September 30, 2010. Please submit comments on these documents to:

TVA  
P.O. Box 40  
Kingston TN 37763-0040  
ATTN: Kingston Public Comments

Or email your comments to: [kingstoncomm@tva.gov](mailto:kingstoncomm@tva.gov).

After the 30-day comment period, a written response to all pertinent comments will be prepared in a responsiveness summary and placed in the Administrative Record.
